

SUMMARY

Full Stack Fintech Engineer with 1+ year of experience building payment systems, merchant portals, and mobile apps at a UK-based payment processor. Engineered a script-based embeddable portal live in production with Foodhub (UK), a DDoS-hardened Pay by Link, and sole end-to-end Adyen onboarding across 6 markets. Earned 2 engineering awards within first 8 months.

SKILLS

LANGUAGES	JavaScript · TypeScript · Python · Java · SQL
FRONTEND & MOBILE	React.js · Redux Toolkit · Tailwind CSS · PWA · React Native · Expo · NativeWind · Deep Linking · Chrome Extensions (MV3) · GSAP · Framer Motion
BACKEND & CLOUD	Node.js · Serverless · Microservices · Cloudflare Workers · AWS (Lambda, SQS, SNS, SES, EventBridge, DynamoDB, S3, SSM, CloudWatch, API Gateway, CodePipeline, Amplify, Cognito)
SECURITY & AUTH	JWT · RBAC · bcrypt · Rate Limiting · Origin Validation · postMessage API
DATA & MONITORING	MySQL · MongoDB · Firebase · DynamoDB · Redis · Grafana · InfluxDB · CleverTap
TOOLS	Postman · Apidog · JIRA · Confluence · Git · GitHub · Docker · TablePlus

PROFESSIONAL EXPERIENCE

SDE-1 (Web/App) Apr 2025 – Present

DATMAN LTD, BENGALURU — UK-based payment processor serving global merchants

- Built **Pay by Link** — hardened with **HMAC signatures, concurrency controls, and rate limiting**, mitigating DDoS and payment-link abuse on a public-facing payment surface
- Engineered a **script-based embeddable merchant portal** (beyond iframe) with origin validation and secure cross-domain messaging — **live in production with Foodhub (UK)**
- Led **Adyen merchant onboarding** end-to-end across **6 markets (UK, US, AUS, NZ, MEX, IRE)** — owning frontend, backend; significantly reduced manual ops effort and onboarding time
- Designed a **state machine** orchestrating merchant transaction-report generation — explicit lifecycle states with automatic retries, replacing fragile ad-hoc report jobs
- Lead frontend developer** for the merchant portal — partnered with the Product Manager on UX and prioritization; also redesigned the **payment card form UI** on the highest-traffic checkout surface
- Built and maintained the **reseller portal** across **8 major modules** serving global clients including **QuickChow, Foodhub, FastFood OS, and eDining Express** — architected as a **Cloudflare-based monorepo** enabling white-label deployment per client
- Converted the merchant portal to a **Progressive Web App (PWA)** — implemented service workers, offline caching strategy, and home-screen install support, enabling merchants to access the portal without a native app install
- Hands-on AWS: CI/CD with **CodePipeline + Amplify**, secrets via **SSM**, queues on **SQS**, storage on **S3**, data in **DynamoDB**, observability in **CloudWatch**
- Worked across the **payment domain** — **webhook processing, 3DS/SCA flows, chargeback disputes, PCI-aware card handling**

Full Stack Web Developer Intern Jul 2024 – Dec 2024

MEDANJALI HEALTHTECH PVT. LTD., JAIPUR — Remote

- Owned the frontend of **Politik Connect** (React.js, TypeScript, Tailwind CSS) — delivered **8+ key modules** with API integration and state management via Context API and Hooks

EDUCATION

B.Tech — CS & Engineering Dr. APJ Abdul Kalam Technical University CGPA: 8.81	2021–25
Intermediate (ISC) Hartmann College, Bareilly — 97.25% (First Rank)	2020–21
High School (ICSE) Hartmann College, Bareilly — 94.8%	2018–19

ACHIEVEMENTS

- Resilient Innovation Award & Rising Star Award** — Datman Ltd, both within first 8 months, recognizing impactful contributions early in my career.
- Academic Excellence Scholarship** worth Rs. 1,37,000 during B.Tech
- Consolation Prize**, National Hackathon 2.0 (2024) — SRMSCET, Bareilly
